PERSONAL PROJECTS

Decotechs (01/2022 - 03/2022) [🔗](#)

- I designed and developed this company portfolio website using React and Ant Design (antd), combining a powerful frontend framework with a sleek and modern UI library to showcase our services and accomplishments effectively.

Trackrr (05/2022 - 12/2022) [🔗](#)

- Trackrr is an employee management system designed to efficiently handle various aspects of workforce management, including attendance, project tracking, and daily task management, streamlining the process for enhanced productivity.

Resturent-App (11/2021 - 12/2021) [🔗](#)

- The 'Restaurant App' is a React Native application that I developed during my learning days as a practice project. It serves as a testament to my commitment to honing my skills and gaining hands-on experience in mobile app development.

Edrella (09/2022 - 06/2023) [🔗](#)

- Edrella is a student management system, inspired by the functionality of platforms like Google Classroom and Facebook. It combines elements of both to provide a comprehensive solution for educational institutions, offering tools for class management, communication, and collaboration among students and educators.
